-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

## **DETAILED ACTION**

### ***Specification***

1. An application in which the benefits of an earlier application are desired must contain a specific reference to the prior application(s) in the first sentence of the specification of in an application data sheet (37 CFR 1.78(a)(2) and (a)(5)). The specific reference to any prior nonprovisional application must include the relationship (i.e., continuation, divisional, or continuation-in-part) between the applications except when the reference is to a prior application of a CPA assigned the same application number.

Applicants have submitted an Application Data Sheet, and therefore no priority statement as the first sentence of the specification is required. However, if such a claim is present, it must be accurate. Accordingly, the amended priority claim statement set forth as the first sentence of the specification is objected to because it fails to meet the requirements set forth above. Specifically, it does not state the relationship between the instant application and 09/672,612, and incorrectly identifies 10/359,336 as a divisional application. The simplest resolution to this issue is to cancel both the preliminary amendment to the specification and the section "CROSS-REFERENCE TO RELATED APPLICATION" as originally filed at page 1 of the specification.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 26-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(a) Claim 26 (and claims 27-39 as dependent thereon) recites in part (7) “ ... the  $\alpha$ -olefins generated from the active ethylene oligomerization catalyst” (underlining added for emphasis) and this phrase is drafted in a manner which implies that olefins have been oligomerized in a previous method step which is included in the claim (such as that recited in step (2) of cancelled claim 1). However, the text of claim 26 includes no previous oligomerization step, and therefore it cannot be determined whether the method includes an oligomerization step. Applicants’ remarks filed 9/10/2003 have been considered, and the following is noted. First, contrary to applicants’ remarks, the claim states neither that the oligomers are introduced from outside the reactor nor that they are not formed in-situ. Second, the remarks do not address the issue of whether or not the claims include an oligomerization step. The fundamental ambiguity of whether or not the claims are intended to include an oligomerization step precludes a properly focused search and consideration of the prior art at this time, including the references cited on the IDS filed 9/10/2003.

(b) Claim 26 (and claims 27-39 as dependent thereon) are indefinite in that it cannot be determined whether “the  $\alpha$ -olefins generated from the active ethylene oligomerization catalyst” of component (7) are the same as or in addition to those set forth in component (6). If the same monomers are being specified, it would appear that

Art Unit: 1713

a more simple and clear phrasing would state in component 7: "the  $\alpha$ -olefins of component (6)".

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roberto Rábago whose telephone number is (571) 272-1109. The examiner can normally be reached on Monday - Friday from 8:30 am - 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu can be reached on (571) 272-1114. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
